

BITBUCKET REPO

- Asim Branch

- LOCALDEV Branch

ASIM WORKSTATION

- Asim Branch AND Work Area.
- Merges are done here.
- Root of working directory is pms-es

Push and Pull

- LOCALDEV Branch AND Work Area for Backup
- Root of working directory is pms-es - Localdev

- Each developer's local repo is permanently connected to his personal remote repo ("Tracking")
- Each developer makes code changes continuously
- Frequently, commits to local repo.
- Daily, PUSH to Remote copy of personal repo
- Periodically, switch to LOCALDEV, PULL, SWITCH TO ASIM, MERGE FROM LOCALDEV, -TEST-, PUSH to ASIM
- To post changes to LOCALDEV, switch to LOCALDEV, merge from ASIM, PUSH, switch to ASIM (critical!)
- For a backup, go to LOCALDEV Work Area, PULL
